# Design ideas

- Keep track of multiple game rounds with a win counter

- Allow game customizable options, time limits, board size, game rounds, name & profiles etc

- CSS effects, animations to display token

- **Research LocalStorage** or **SessionStorage** to persist data locally to allow games to continue after page refresh or loss of internet connectivity

- Use timers to display "waiting..." messages while users are waiting to be matched

- **Research** web audio API and add sound effects to your game??

Super Mario theme

- Old Nintendo background

- Mario on left, Luigi on right

- The grid squares will be question block

- Title, X and O will be in Super Mario font

- Display the winner in a modal overlay

- Reset button

- Enter names for players

- Scoreboard will be white text at the top like this

- Add hover effect to the squares
